ABOUT ME

As a proactive individual I believe in the power of trying; "no" is always the answer by default. Failure, to me, is not something to be feared as it provides an opportunity to learn and discover alternative approaches to achieve one's goal. I possess an innate passion for creation and learning. I actively seek knowledge and inspiration from various sources such as the Internet, experienced individuals, and my own experiences. I approach challenges with a positive and open-minded attitude, and I am committed to putting in the necessary effort to achieve my goals. Throughout my studies, I have developed an interest in various subjects, with Networks, their design, and implementation being one of my favorites. Among my preferred courses are Switching, Communication Networks and Services, Access Network and Shared Media, Internet Architecture and Software Defined Networks. My interests include traveling, programming, reading, staying up-to-date on emerging technologies, photography, cinema, and practicing sports.
